

MOTOR CONTROL BASICS

WHO SHOULD ATTEND?

Operators, Maintenance Technicians (Mechanical, I&C), Junior Engineers, and others who want to understand motors and how to control them.

Earn up to 7.0 CWEA contact hours.

TOPICS AND SPEAKERS*

The CWEA SF Bay Section's Professional Development Committee (PDC) will be holding a full-day seminar on Motor Control Basics. Based on highly positive feedback for his hands-on training provided in CWEA's North Coast Section, Bill McBroome has agreed to participate in a Motor Control Basics training class for CWEA's SF Bay Section. Our format, however, will include both a lecture portion (provided by Diep Nguyen, DTN Engineers) and hands-on exercises (by Bill McBroome, McKinleyville Community Services District). Since each class will be LIMITED to about 20 people, we are offering the class on 6/6 and on 6/7 (choose one date). Sign up early to secure a spot!

Topics we expect to cover include:

- Motor Fundamentals
- Motor Controller Basics
- Motor Control Centers
- Motor Control Circuits
- Hands-On Exercises

**Seminar topics and speakers are subject to change without prior notice.*

For more info, contact:

Linda Leong | (415) 920-4919 | lleong@sfwater.org
